Outsourced & On-Site Conversion Project Management, Consulting & Data Analysis

Strategic Planning, Independent Quality Assurance (QA), Automation Options & More

Companies today are challenged with limited resources while still being required to meet critical deadlines and maximize overall ROI. Converting legacy data is an arduous task under the best circumstances, let alone without the benefit of experienced management to guide you through the process.

DCL's professional conversion management team assigned according to industry vertical and DTD based on their individual expertise will support you at any point in the process for the best and most accurate results possible.

Early planning and solid preparation are the key elements to a successful data conversion implementation. As your full service provider, vendor manager or support for do-it-yourself (in-house) conversion projects, DCL's expert team of professionals will help you determine the correct approach, coordinate internal or outsourced resources, manage your resources throughout the project, perform independent QA services pre and/or post conversion and more.

DCL will ensure your project will be completed on-time, on-budget, and within the highest level of accuracy possible.

Conversion Management Services include:

- Full Lifecycle Consulting
- Project Development and Planning
- Data Evaluation and Specification
- Business Case Analysis and Report
- Format Structuring
- Vendor Selection
- Training
- Automation Options
- Conversion Planning
- Feasibility Analysis
- Content Reuse Analysis
- Workflow Analysis
- Project Management
- Vendor Management
- Quality Assurance
- Software Development

Results are guaranteed!
We view our job as finished only when your data is delivered and successfully deployed.

MOVING YOUR CONTENT ASSETS TO DITA

Maximize content reuse and minimize production time

Businesses increasingly look to DITA (Darwin Information Typing Architecture) as a way to organize and leverage current and future content. It makes strategic and financial sense to automate content management using XML across the enterprise, but it can be a daunting challenge unless you have the right partner.

DCL can help.

DCL has 30+ years of expertise implementing end-to-end solutions that answer all of your content management challenges:

- **Scalable solutions that support consistent user experience:** From one document to millions that produce outputs on any platform, in any media.

- **Automation:** With the most advanced automation techniques, our SaaS platform and extensive collection of tools greatly improve content reliability and reduce costs.

- **Content that supports global markets:** DCL's extensive foreign-language conversion capabilities incorporate structures and processes that streamline translation and lower overall costs.

- **Large-scale conversion project management:** We use proven implementation methodologies that provide demonstrable, high quality results for projects having throughput requirements of up to thousands of pages per hour.

- **Support to meet standards and compliance:** DCL has deep, practical familiarity with structural and content-based DTDs for all of the major standards, including DITA, NLM, JATS, BITS, S1000D, and OeB, as well enhanced and custom schemas and DTDs for XML transformations.

- **Support for complex content types:** DCL's specialized content conversion expertise includes analysis, conversion and quality checking of content such as formulas, complex tables, intricate illustrations, and more.

- **Expertise in your industry:** DCL's clients range from small firms to large multi-national organizations in technology, manufacturing, pharmaceuticals and publishing, as well as local, regional and national government agencies.

With the right solution to convert, structure, manage and reuse content, you can enter new markets, expand audiences and increase revenue. Let DCL help your organization harness your existing content, to drive efficiencies, customer experience, and new revenue opportunities.

Talk to DCL about how our XML and DITA conversion services can transform your content and your business.
