

Miramo[®] XML automated publishing

All the power, one tenth the time

That's the deal with MiramoPDF. You can produce beautiful document designs in minutes, and change 'em quicker than changing your shoes—without encountering a line of XSL:FO. You can integrate MiramoPDF with any custom publishing environment, or slot it in with the DITA-OT and your XML editor of choice.

The two components of MiramoPDF, MiramoDesigner and mmComposer, provide a no-compromises solution. With the MiramoDesigner GUI you can design the document layouts you need and define the properties of the text and graphic objects.

MiramoPDF is a revolutionary solution that combines the highest capabilities with the maximum flexibility and convenience and the lowest implementation costs.

Business benefits

Based on standard XML technologies, MiramoPDF provides you with many business benefits:
